

The Green Bus

What is The Green Bus?

The Green Bus is a low carbon way of getting to school. We aim to make your journey between home and school safe, reliable and fun!

- **For pupils** – The Green Bus is a social experience – a great place to meet and make friends and use the free WiFi on board. We plan each route carefully so that your stop will be a short distance from where you live.
- **For parents** – each bus replaces up to 100 daily car journeys, and we offer the same degree of certainty and safety as the car. If there are changes to the bus service, or it is delayed, we will send a text to both you and your child. If necessary we will inform the school. This is a practical, useful and cost-effective way to do your bit for the environment and be green.

Did you know?

- Reducing car journeys is important for everyone. Getting driven to school isn't cool, it's a dangerous and expensive way of making harmful waste.
- Last year The Green Bus saved nearly 600,000 car journeys – that's an awful lot of poison gas!
- Every bus saves up to 100 car journeys every day. It makes a huge difference to the environment.
- TV Companies and Senior politicians have noticed and publicised The Green Bus. It's a fantastic way to start saving our planet.
- At some of our schools that we work with, five out of every six children in Year 7 now use The Green Bus. It's time for you to join in this brilliant idea!
- We use cutting-edge GPS tracking technology so that you can keep an eye on our buses. You can check out where your bus is whenever it is in service. Type your user name and your secret password into our website. You'll know immediately where your bus is, so you can tell how soon it will arrive at your stop. The information is refreshed every 10 seconds.
- Occasionally, problems with traffic can sometimes make a difference to timing. Just make sure you are at your stop five minutes before it is due.
- You and your child will receive a text message if there are delays of 10 minutes or more. The text will say what you should do next – usually to remain at your bus stop.
- If you're going to school for an exam don't worry. The Green Bus managers will know about this and we'll make special arrangements to get you in on time.
